

WING COMMANDER®

# PRIVATEER™

**SPEECH PACK**

## INSTALL GUIDE

### SYSTEM REQUIREMENTS

To use the Speech Pack for *Privateer*, you must first:

1. Install a Sound Blaster, Pro Audio Spectrum or 100% compatible digitized sound card.
2. Install *Privateer* on your machine. If you have not installed *Privateer*, stop and install the game before continuing with the *Speech Pack* installation.
3. Make sure you have at least 7 megs of additional space available on the same drive on which your original *Privateer* game is installed.

**Note:** You can install the *Speech Pack* onto your hard drive even if you do not have a Sound Blaster or Pro Audio Spectrum card installed in your machine. However, you won't be able to hear speech until you install one of those two cards (or a 100% compatible card) and re-run the *Privateer* install program to let the game know that you've changed your configuration.

### INSTALLATION GUIDE

The *Speech Pack* install program does the following three things:

1. It asks you where your *Privateer* files are located (both the drive and the directory).
2. It modifies your *Privateer* sound board configuration (if necessary).
3. It copies the speech files from the *Speech Pack* disks to your hard drive, decompressing them in the process.

### Installing the *Speech Pack*

1. Insert Disk 1 of the *Speech Pack* into the appropriate drive.
2. Type that drive letter followed by a colon, then  (for example, A:).
3. Type SPEECH .

### 4. The Installation Screen

The install program asks you for information about your configuration, so that it can install the file properly onto your hard drive.

## TROUBLESHOOTING

### 5. Selecting the Path

You are asked to enter a path name. Type the full path you chose when you installed *Privateer* (including the drive letter), then press **Enter**. (If you accepted the default directory that the *Privateer* install program suggested and that the *Speech Pack* install program suggests (PRIVATER), just press **Enter**.)

If the *Speech Pack* install program cannot find your *Privateer* game in the location specified, you will be asked to enter a new drive and path. If you continue to have trouble and are sure that you typed the correct path, feel free to contact our Product Support department at the phone number below.

### 6. Copying the Files

Once the install program has confirmed the location of your game, it begins copying and decompressing the speech files onto your hard drive.

At this time you are prompted to insert the remaining disks from the *Speech Pack*. Continue as prompted until all files are copied to your hard drive.

### 7. Beginning Play

When the installation process is finished, make sure that you are in your *Privateer* game directory, then type PRIV **Enter** to begin play.

1. If you experience any difficulties during installation, run the *Privateer* install program to ensure that the game is properly installed to use your speech card. Be sure you have selected SOUND BLASTER or PRO AUDIO SPECTRUM in the configuration screen.

2. *Privateer* and the *Privateer Speech Pack* work with DOS 6.0 *DoubleSpace* disk compression. If you need to, consult your DOS manual for help with *DoubleSpace*.

3. If the install program reports difficulty finding your sound card, check to make sure that you have selected the correct I/O and IRQ, and that they are not being shared by any other peripherals. Consult your sound card documentation if you continue to have difficulties.

4. If you are having a problem with the installation and have tried these suggestions, contact ORIGIN Product Support at (512) 335-0440, Monday through Friday, between 9 a.m. and 5 p.m., Central time.
