USING A JOYSTICK

Between Missions: Move the joystick to maneuver the arrow-shaped pointer around the on-screen picture. When the pointer's shape changes into a cross, press button #1 to select functions.

In Space: The diagrams on the right show the movements of the joystick and the use of the joystick buttons for basic flight control.

- **Turn left or right** by moving the stick in the appropriate direction.
- **Climb or dive** by moving the stick toward or away from you.
- **Fire selected guns** by pressing button #1. You can fire while maneuvering.
- **Fire the afterburners** by double-clicking button #2.
  The afterburners stay lit until you let up on the button.
- **Fire a selected missile** by pressing both joystick buttons at once.
- **Increase speed** by holding down button #2 and pushing the stick away from you.
- **Decrease speed** by holding down button #2 and pulling the stick toward you.
- **Roll the ship** by holding down button #2 and pushing the stick left or right.

JOYSTICK ONLY
Dive/Nose Down
Steer Left
Steer Right
Climb/Nose Up

JOYSTICK AND PRESS BUTTON #2
Increase Speed
Roll Ship Left
Roll Ship Right
Decrease Speed

USING A MOUSE

Between Missions: Move the mouse to maneuver the arrow-shaped pointer around the on-screen picture. When the pointer's shape changes into a cross, press the left mouse button to select game functions.

In Space: When you move the mouse, a white, circular pointer appears in the viewscreen. Your ship homes in on the pointer. Maneuver by moving the mouse until the pointer is where you want to go. You travel in that direction until you move the mouse to a new position.

- **Turn left or right** by moving the pointer toward the left or right side of the viewscreen.
- **Climb or dive** by moving the pointer toward or away from you.
- **Stop diving, climbing or turning** by placing the white pointer inside the green sights in your viewscreen.
- **Roll the ship** by holding down the right button and moving the mouse left or right.
- **Kick in the afterburners** by double clicking on the right mouse button. Release the button to stop the afterburners.
- **Increase speed** by holding down the right button and pushing the mouse away from you.
- **Decrease speed** by holding down the right button and pulling the mouse toward you.
- **Fire selected guns** by pressing the left mouse button.
- **Fire selected missiles** by pressing both buttons simultaneously.

MOUSE ONLY

Climb/Nose Up

Pointer Left/Steer Left — Pointer Right/Steer Right

Dive/Nose Down

MOUSE & HOLD RIGHT BUTTON

Increase Speed

Roll Ship Left — Roll Ship Right

Decrease Speed

USING A KEYBOARD

Between Missions: Use the arrow keys or numeric keypad to move the arrow pointer. When the pointer's shape changes into a cross, press (ENTER) to select functions.

In Space: Both the numeric keypad (with Num Lock off) and arrow keys are active for controlling flight.

- **Gradual turns** are initiated by pressing a directional key alone. Let up on the key and you continue straight ahead in the direction of your last key press.
- **Sharp turns or rolls** are initiated by pressing (SHIFT) and the appropriate key simultaneously. Let up and you continue in a straight line.
- **Climb or dive** by pressing the up or down arrow.
- **Roll left** by pressing the (INSERT) key.
- **Roll right** by pressing the (DEL) key.
- **Increase speed** by pressing the + (plus) key.
- **Decrease speed** by pressing the - (minus) key.
- **Decrease speed quickly** by hitting the (BKSPC) key.
- **Fire your afterburners** in a short burst by pressing (TAB) or * (numeric keypad). Hold down the key to keep your afterburners lit.
- **Fire selected guns** by pressing (SPACE). You can maneuver at the same time.
- **Fire selected missiles** by pressing (ENTER).
