

# Toonz

I Combine side scrolling + cartoon action?  
- side scrolling GP "travel." At various locations thought balloon appears above char, head containing pictures. Select a picture and go to a cartoon scene (still under player's control, I hope)

5. Cut to cartoon

6. Back to side scroll

# Privateer 2:

## Cyclone Alley

Locks

1. Ed, Art, Phil, Paul S.
2. Inc. Art's small missions leading to bigger mystery concept and overall "Coby" approach.
3. In course of story, player decides and/or figures out that he should "drive" in the Confederation's most popular sports event - the Cyclone Alley circuit. Fly from place to place as usual, all mission types available, but each week player can compete in a race, on anti-gravity cycles, just as in Paul's proposal. Acquire a pit crew, deal with unscrupulous sponsors (part of big mystery?), maybe win the championship.

After storyline is finished, player can fly around missions, as in Privateer, or continue to race in Cyclone Alley circuit on both. 2 same show, using same/similar technology. It's perfect!
