Welcome to the Universe...

PRIVATEER 3 is a universe all its own. Never before in the space trading/combat genre has there been a game that has so fully and totally encompassed the player in an environment so rich in detail.

* 57 different ports to visit!
* 62 solar systems to investigate!
* 2316 separate action spheres to explore!

All the planets, orbiting platforms, and asteroid stations are unique, having their own economies, governments, and industry.

You will be able to spend weeks just exploring the star systems, searching for hidden outposts, derelict ships, Kilrathi and Confederation alike, while hunting for fugitive pirates and outcasts, seeking to enrich the economy of the system, or to enrich yourself and your allies.

In the space trading/combat genre, there’s been a great deal of effort to add realistic economic factors and to keep the player involved in the economy. In PRIVATEER 3, you’ll have even more opportunity to affect the economy of the universe, both for profit and for adventure.

Kilrathi and Confederation alike will patrol the void trying to plug the leaks in their economy and to gain control of commercial routes. As you choose your actions, your objectives and your allies, you’ll see the systems and ships respond, becoming strongholds for you, or easy targets for your opponents.

PRIVATEER 3 has 57 unique worlds and space ports to visit, each of them having its own economy, government, industry, and technology level. These factors are translated into the types and prices of commodities on the world, as well as to the availability of weapons for purchase. Each location comes complete with its own detailed history, while factors that you can manipulate can change the economy, or even the future, (running guns can lead to a change of government, while importing dangerous xenomorphs can lead to the port being quarantined!)

For all who play PRIVATEER 3, no two games will ever be the same.

Furnace
Type: Asteroid
Industry: Mining
Government: Corporate

Owned and operated by Furnace Metals Limited, this mining outpost is a model of efficiency. Miners from across the sector come here to prospect as the system is rich in gold, platinum, jewels and other heavy metals. The accumulation of wealth has also attracted pirates, who prey on the hapless and unlucky in the asteroid belts.

Yena
Type: Planet
Industry: Agricultural
Government: Envirochy

Yena produces some of the finest in synthetic meats found in the quad. It’s close proximity to New Damascus and Vigilance assures it of a steady supply of credits for its good work. However, much of the wealth is squandered by the government which constantly is finding new environmental concerns on which to spend money. Terrors are a hard, proud people, though many off-worlders think of them as loud and obnoxious.

Gtok IV
Type: Floating City
Industry: Manufacturing
Government: Kilrathi

Gtok IV is a floating industrial city. Built forty years ago, it is still expanding to this day. Antigravity engines keep the platform afloat above the toxic surface of the planet which is heavily laced in highly concentrated sulfuric acid. The atmosphere is poisonous but a rebreather is all that is required, though a trip to the surface without a full body suit would result in death. Gtok IV is a prime example of Kilrathi ingenuity and determination to dominate everything they can use. Gtok IV is known sector-wide for its refined tritanium.

New Paris
Type: Water Planet
Industry: Tech Planet
Government: Monarchy

One of the older, populated worlds in Archangel Quadrant, New Paris has a tech planet industry, making it a center for technology and research.
Other locations that will feature the PRIVATEER 3 new technology include orbiting space stations which are larger than any other objects ever constructed for the Wing Commander universe. Technology will not only allow you to experience the thrill of fighting in outer space, but also in inner space!

You can fly into these huge constructs and down vast corridors built within them. You will need to brave these tunnels in order to take out turrets, missile launchers and shield generators. Then, with your last torpedo, you can destroy the fusion generator that will allow you only thirty seconds to escape the huge structure before its final glory.
