Subject: WC Prophecy docs: Do or die day

This is it guys. Drop dead time.

Playguide: Text absolutely, positively must lock down today. If you need to sign off on this material, do NOT plan on going home tonight until you have both SEEN and SIGNED OFF on this doc. I'll be making a nuisance of myself today, to see that this keeps moving.

I think we're in good shape, over all, but we absolutely cannot allow the process to bog down today. Please, if this doc hits your desk, READ IT right away!

Install Guide: Dave has indicated to me that he wants to talk to Marcia about the schedule. For the moment, however, and until I hear differently this pub remains on the exact SAME schedule as the Playguide, above. If the schedules does not change, we've got some major obstacles in our way. Specifically:

NEW INSTALL ROUTINE: I keep hearing there are significant changes to this in the works. Please lock them down and get them to me ASAP.

CREDITS: This is a huge, raw, gaping hole in the doc right now. Especially since credits are always a signoff nightmare all by themselves.

Ref Card: I got a round of corrections on Friday which Cath now has and will implement as soon as she gets in. If there are further changes from the weekend, I need to know soonest. (This is not, however, as big a priority as the other two docs - at least not for today.)

Really, folks, I do appreciate everybody's help so far, and these goals are not impossible - both docs are actually pretty solid. We just must have this one day of concentrated attention. We need to get this material over to translations on schedule - we've asked them to go way beyond the call of duty already on this one.

Ref Card
