Subject: MED school notes

Andy, will you look over this and see if there are any errors before I send it out? If there are, will you correct them, please?

Thanks!
bjc

Exerpts from Andy's short MED class.

Spaceflight Programs may use:

- FLO code (if / assignment / while / etc)
- AI commands
- SF commands
- SYS commands

Gameflow Programs may use:

- FLO code
- GF commands
- SYS commands

Mission Programs may use:

- FLO code
- MS commands
- SYS commands

MCPProgram

- FLO code
- MCP commands
- SYS commands

This is what is currently true.

Definitions. These are important for communication!

Series

- *New definition:* Series is the MCP (Master Control Program), and controls all missions. Known previously as the Mission Tree. Short definition: Series = MCP.
- *Old definition:* Cluster of missions (4 or less) (Multiple series made up the older, now defunct Series Tree.)

Gameflow

- *New definition:* A specific room with hotspots.
- *Old definition:* Any room with hotspots.

Spaceflight

- *New definition:* Flying around in space, built from a specific data file.
- *Old definition:* Flying around in space anywhere.

Mission

- *New definition:* A combination of specific Gameflow room(s) plus the associated Spaceflight file.
- *Old definition:* Flying around in space, built from a specific data file.
