To: ML WCP PROGRAMMERS; ML WCP DESIGN
Subject: More features

- heat seekers now can loose their targets in mid-flight
- any missile which is set to MF_ACQUIRE_NEW_TARGET (mines and friend or foes right now) will automatically select a new target when theirs goes null
- enemies will taunt you if they spoof your missile

Going home to sleep finally. I'm sure I'll be in late Friday. I'll be coming in over the weekend.

<yawn!>
