Designer notes:

After losing in either series C & D during act one, or E & G during act two, the Midway is once again on the retreat and must defend a Confed starbase on the edge of Confed space(Alcor?). The first mission will be to defend the starbase against waves of enemy fighters and bombers. If the base is destroyed the Midway will comm the players wing informing them they are jumping out of system to (Sol or Proxima) and he had better hurry home before he gets left behind. If the player doesn't return within X amount of time the Midway will jump without him, leaving the player behind to fight endless waves of aliens. If the player is successful the Midway will show up and give him clearance to land.

LANDING START:

at ICIS and is pissed off, random atta-boy, etc.

Designer notes:

After defending the initial assault on the Starbase the Midway must now take out the source of the fighters, an alien cap-ship fleet. If the player failed to destroy all of the alien fleet in C & D, they will be part of this fleet. The players wing, Bravo team flying Shrikes, will be assigned to destroy 75% of all anti-aircraft defenses (missile and laser turrets) in the alien fleet area. If he doesn't accomplish his mission within X amount of time the retreat back to earth will be called and the player will then have Y amount of time to get back to the Midway and land before he is left behind. Alpha wing, from the Diamondbacks squadron, will arrive at the NAV point first and take out the fighter cover surrounding the Alien fleet. After X amount of time they will comm the players team, Bravo, telling them it's safe to join them. Bravo team will then have X amount of time to destroy a certain percentage of the alien fleets anti-aircraft weaponry and comm Charlie team to inform them the coast is clear. Then devastators from the Wolf pack squadron arrive and proceed to destroy the cap-ships with torpedoes.

After failing to protect the confed star-base in **L1**, or failing to defeat the alien fleet in **L2**, the Midway has retreated back to Sol (I heard some grumbling at the meeting when I mentioned this so maybe Proxima?[see WC universe map for details]). The player is sent to Intercept alien fighters and bombers jumping in from Alcor. After the first wave of Alien bombers is destroyed the Alien cap-ship fleet jumps into the system

Additional Comments

I'm leery of missions that can't be won(see R series in WC3) so I'd probably rather limit the aliens to a finite number, instead of the infinite number of aliens I had originally planned, and let the player go back to the winning series path if he and the Midway survives. Instead of making the mission impossible just make it very hard.
