A short corridor near the dining area, providing an example of the elaborate set dressing devised by Roger Christian.

The towering landing leg of the *Nostromo*, nearly 10 meters tall, built entirely of wood and painted to resemble metal.

LEFT: The Nostromo Airlock, ink & felt tip pen, showing its side profile. The airlock is a large, circular structure with a complex internal arrangement of pipes and valves. The model is shown from a low angle, emphasizing its massive scale.
