

The Wing Commander Prophecy: 30th Anniversary Edition has more versatile joystick support thanks to the team at GOG. In-game joystick activation is required, and basic default control schemes have been mapped for the following joystick models:

- Logitech Extreme 3D Pro
- Logitech Attack 3
- Logitech X86 (Stick only)
- PXN 2113 Pro
- Thrustmaster T16000M
- Thrustmaster T.Flight Stick X
- Thrustmaster T.Flight Hotas X
- Thrustmaster Sol R1

For any of these joysticks on PC, ensure that Steam Input is disabled (it should be off by default).

To activate your joystick, follow these steps:

1) Boot the game
2) Once on the Midway, press Esc to bring up the Pause menu
3) Select “Options Menu”
4) Select “Gameplay”
5) Under the “Control Type” section, choose “Joystick”
6) Select “Accept” and Return to Game

Joystick Default Controls:

Pitch / Yaw = Stick direction

Fire Guns = Button 1 (Trigger)
Fire Missile = Button 2
Afterburners = Button 3
Cycle Target = Button 4
Button Modifier = Button 5
Target Nearest Enemy = Button 6
Decoy = Button 7
Comms = Button 9

Options Menu = Button 10

Roll Left = Twist Joystick
Roll Right = Twist Joystick

View Front = Hat Up
View Right = Hat Right
View Left = Hat Left
View Rear / Rear Turret = Hat Down

Speed Control = Throttle

- Note, the Throttle is only working with certain joystick models. We apologize for any inconvenience.

On the Ship:

Move Cursor = Stick direction
Select = Button 1 (Trigger)

Cycle Hotspot Forward = Button 2
