Fleet-wide Memorandum

Approved Missile Designations

FROM: TCN/TCSF Arms Commission

TO: All Officers; Weapon Crews

Update: Effective immediately, the following TCN/TCSF missile designations have been finalized by the TCN Arms Commission and are approved for general use. All future equipment deployment requests should reflect the new nomenclature.

ELRIR Enhanced Long-Range Image-Recognition Missile "Artemis"

ELRAR Enhanced Long-Range Anti-Radiation Missile "Ravager"

ELT Enhanced Light Torpedo

Enhanced Torpedo

CLASSIF

Ш

"Lancer" "Pike"____

MISSILES

"Mosquito" Enhanced Rocket Pod

The enhanced rocket pod (designated "Mosquito RP") is an enhanced version of the standard-issue rocket pod that mounts a smaller variant of the friend-or-foe seeker. This gives it added functionality, although it has a decreased warhead yield and retains the same basic flight characteristics as the Dragonfly rocket pod. After launch, individual missiles have the ability to perform slight pitch and yaw adjustments.

TCS CERBERUS

Internal Memorandum

Mission and Threat Assessment

FROM: Command

TO: All Officers

Mission: Beginning 2681.061 and continuing until such time as further orders are received, the TCS Cerberus and all personnel thereto attached shall engage in a SECURITY AND PEACEKEEPING PATROL of Courage System and environs.

This mission is classified as a Peacetime Tactical Operation. All personnel shall be eligible for combat pay and full death benefits. Cerberus shall maintain readiness level ORANGE at all times for the duration of this operation.

CLASSIFIED

THREAT ASSESSMENT

TCS intelligence and security sources indicate that the following threats are the most likely to require armed intervention in the current theater of operations.

1. Looting/Smuggling

In the weeks since the end of the engagement with the so-called "Nephilim" aliens in Kilrah System, a thriving trade in alien artifacts and technology has arisen. Numerous alien hulks and derelicts were abandoned by the aliens when their forces were sealed off at the Kilrah portal. Human scavengers have mobilized to locate and secure technology and other valuable salvage from these artifacts, and Proxima System has become the major pipeline in this black market. It is imperative that this technology be protected until it can be collected and analyzed by official Confed sources, both because of the potential for valuable military intelligence and technology to be gleaned from the alien vessels, and because of the unknown risk factor which these artifacts may present to the population at large. Already armed conflict between scavenger gangs and/or smuggler cartels has erupted over alien derelicts. Therefore, containment and control of such extralegal operations is the primary mission objective of this vessel.

2. Piracy

The curtailment of piratical operations in Confed space is a primary operational priority of this ship, and will be an ongoing component in Cerberus patrol operations. Further, as noted above, the traffic in alien salvage has already engendered an upswing in piratical conflict between would-be looters, and in the absence of strong control measures this trend can be expected to continue and eventually spread to actions against lawful mercantile traffic.

3. Alien Incursion

At the moment, military intelligence assigns a low probability of an alien incursion in the Vega and Epsilon Sectors, however all Confed fleet and intelligence assets are under standing order to maintain high awareness of any possible evidence of a recurrence of any activity of the "Nephilim" entities in Confed space.

4. Insurrection

At the moment, military intelligence and Confed security sources assign a low probability of armed rebellion or coordinated terrorism in Vega and

Ш

Dust Cannon

The dust cannon operates on the same principle as a mass driver cannon, but its ammunition is generated by culling out particles from the core exhaust filter. It has increased efficiency and damage potential over the mass driver, and is nearly twice as fast as any other Confed gun. Few pilots possess enough evasive skill to maneuver out of harm's way against the dust cannon.

Velocity	10,000	Damage	40
Range	5000	Refire Delay	.05
Charge	18		

Cloudburst Cannon

Highly effective, the cloudburst cannon fires an intermittent stream of electrical discharges that are particularly damaging to a target's internal components. An internal, arcing accelerator gives this weapon a long refire delay and draws considerable power, but its shots deliver more damage than any other gun besides the plasma cannon.

Velocity	3200	Damage	100
Range	3900	Refire Delay	.45
Charge	60		

Plasma Cannon

The main weapon of the Devastator, this is the only mounted weapon that can apply severe damage to a capital ship's bridge and engines. It is six times more effective than the Cloudburst cannon, though it draws a great deal of energy and has a long refire delay.

0

OFFICIAL IFAQ: ADDITIONAL CERBERUS WEAPONS INVENTORY

#IFAQ162977

CONFIDENTIAL MATERIAL - DESTROY WITHIN 7 DAYS

GUNS

Chain Ion Cannon

The lightweight version of the normal ion cannon, this gun is best utilized in quick, close-in shots that require a fast refire rate. It operates on a principle similar to that of the ion cannon, but its ionic particles are sped up prior to launch via an ionic chain-reaction accelerator.

Velocity	1800	Damage	20
Range	2500	Refire Delay	.1
Charge	15		

Pulse Particle Cannon

This revamped version of the particle cannon fires four times as fast as its predecessor, and its minute nuclear particles travel nearly twice as fast. Availability is currently limited to the "Black" Shrike and Vampire variants.

Velocity	6500	Damage	30
Range	6500	Refire Delay	.1
Charge	15		

CLASSIFI

Epsilon Sectors, however organized anti-Confed forces are known to be active in these sectors, and any increase in piracy or other criminal activity may serve to destabilize the situation and lead to increased civil unrest.

Officers are instructed to take into account preparedness for all of the above threat categories when planning training and patrol operations.

ADDENDA: BIOHAZARD THREAT

As this document was being prepared for distribution, command received an advisory of a possible biohazard threat in the area. Although a full report is still pending, this preliminary advisory states that there is a danger of fatal contamination through an unknown viral, fungal, bacteriological or other medium. This risk may be spread through contact (direct or indirect) with "Nephilim" alien salvage. Until further notice, class 5 NBC protocols are to be observed during any and all direct contact with:

"Nephilim" artifacts.

Known or suspected smugglers: personnel and equipment

Known or suspected pirates: personnel and equipment

The above information is TCS CONFIDENTIAL, and is not to be discussed off-ship, over non-secure communications channels, or with any non-ship personnel unless specific provision is made to do so through the Compartmentalized Information Officer.

From the desk of:

JAMES TAGGART

Once again, it was a pleasure to see you in person at the ceremonies, and an equal pleasure to receive your

Dear Lance,

recent card. I'm delighted to hear that you and Lt. Talvert had a pleasant and relaxing few days and that the visit with your lovely mother was enjoyable. Your vacation is well deserved, and I'm sorry it had to be so short.

I have been keeping tabs on as much of the Midway's crew as possible, and I trust we will be able to reassemble the bulk of you when it is once again time for the Midway to take her proper place on the frontier.

Terran Confederation Senator General (ret.) TCSF

The Residence Dumfuirlin Scotland Earth Specifically, Admiral Wilford looks infinitely happier after returning home on leave, but I personally suspect he's also happy to once again be Captain Wilford at the helm of the Midway. Like all of us, he's terribly anxious to get back into action, but at the same time he obviously relishes the chance to take the Midway on the "grand tour" and show her off a bit.

Commander Finley and Chief Coriolis are working together like they've been partners for years, and they are daily finding out more and more amazing (though sometimes frightening) facts about our recent enemy. I wish I could give you just a few of the specifics, but of course that's impossible in a non-secure communication.

Finally, Marshall and Commander Drake have been incredibly useful in the vital effort of increasing military preparedness to the level which is obviously necessary in light of recent events. They make an odd team, to be sure, and I can't tell you there's been no friction, but between the

two of them even the most oblivious dove in the Senate is forced to think twice about some of his assumptions. Marshall's always had a remarkable way with both the press and the brass, and as for the Commander, I'm becoming increasingly convinced that if she ever leaves the service she will find an extremely successful career in politics.

I'm pleased to hear you're keeping an open mind about the Cerberus assignment. Although it's not specifically one of my personal projects, I'm extremely excited about the Cerberus program, and I look forward to hearing your views on the ship when next we meet. Let me also add, by the way, that I have every confidence in Maj. Bowen's abilities as a squadron commander, and I'm happy to know you'll be flying with him. Spyder is not an easy man to know, but I can assure you that his friendship is far more valuable than the effort it takes to earn it. I trust you and Stiletto will continue to help him keep Maestro and Zero in line.

As to your final question, Casey, I think you know the answer. I may be a jaded and cynical old pessimist, but if there's one thing I learned from the Kilrathi, it's that an enemy will never "just go away." We dealt the aliens a significant setback at Kilrah, but it can in no way be called a decisive defeat. Yes, I'm afraid I'm quite sure that the aliens will be back, sooner rather than later, and far stronger than before. It is solely my faith in pilots like yourself and your wingmen on the Cerberus that keeps me from despair.

God go with you, Lad, and with your comrades.

Your affectionate friend,

James Taggart
